DR. JILL KAHN - EMPOWERHOUSE GROUP

We each have innate talents and gifts that we are meant to share, but we often hold ourselves back. My specialty is helping people get out of their heads and into action so they can achieve their goals, realize their potential and live their desires.

I blend inspiration with practicality as both are necessary to create lasting transformation. Only through awareness can we change the patterns and habits that are dictating our lives. When we raise our standards and change our beliefs we elevate our behavior. We are then able to take the focused, committed action that leads to success.

As a multiple business owner, award winning documentary producer, and business & personal development coach, I understand the value of vision, leadership, communication, systems and processes.

Having raised four children by myself, while starting my own business, I've become adept at simplifying the complex and breaking through the mental obstacles that stifle success. I offer inspiring and engaging messages to ignite the leadership qualities within each individual helping them raise their personal standards and tap their potential.
